Supplementary Table S3: Results from pooled analysis of secondary neonatal outcomes for the main analysis

Outcome	Diet Subgroup (to add references)	No. of Studies	No. of Women	Effect estimate Relative Risk [95% CI]	I ² (%)
Neonatal hypoglycemia as defined by the authors	All	3	320	0.77 [0.52, 1.12]	0
	Low carbohydrate	1	149	0.91 [0.39, 2.12]	-
	Energy restriction	1	109	0.75 [0.48, 1.15]	-
	Soya protein	1	62	0.44 [0.04, 4.60]	
Preterm birth	All	5	430	0.77 [0.34, 1.73]	0
	Low GI	2	179	0.75 [0.27, 2.06]	0
	Fat modification	1	84	Not estimable	-
	Soya protein	1	68	2.00 [0.19, 21.03]	-
	Behavior	1	99	0.51 [0.10, 2.66]	-
Neonatal intensive care unit	All	2	167	0.53 [0.06, 5.13]	79
	Soya protein	1	68	0.14 [0.02, 1.10]	-
	Behavior	1	99	1.33 [0.73, 2.44]	-
Small for gestational age	All	5	362	0.90 [0.47, 1.71]	0
	Low GI	3	193	1.63 [0.55, 4.83]	0
	Low carbohydrate	1	149	0.68 [0.29, 1.56]	-
	Ethnic diet	1	20	0.33 [0.02, 7.32]	-

Supplemental Table S4: GRADE

The quality of evidence is graded, described and graphically presented in four levels: GRADE[±]

1) Very low quality (⊕○○○) which means there is very little confidence in the effect estimate and the effect is likely to be substantially different from the estimate of effect;

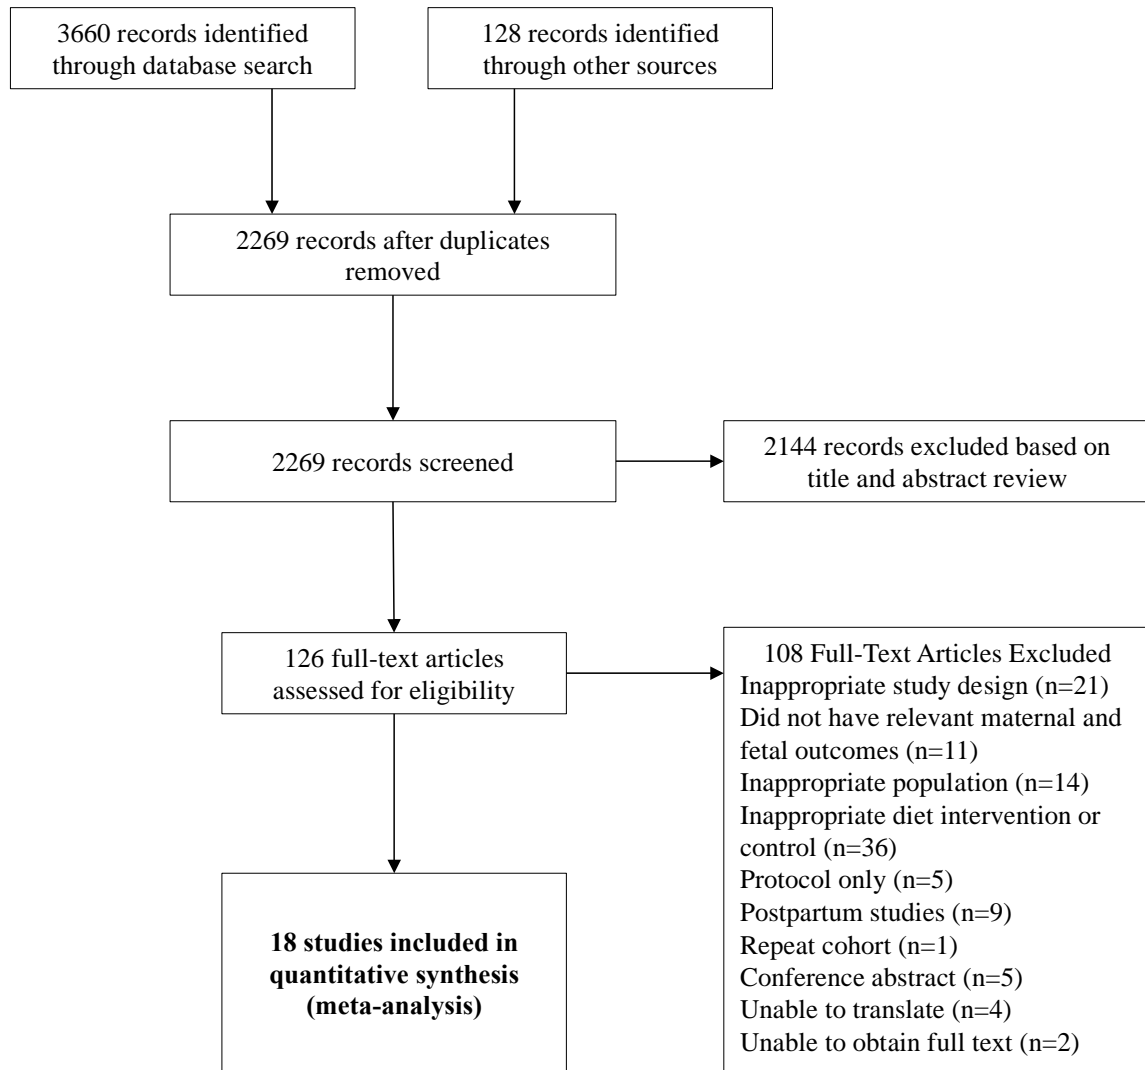

2) Low quality (□□○○), which means there is limited confidence in the effect estimate and the true effect may be substantially different from the estimate of the effect;

3) Moderate quality (□□□○), which means, there is moderate confidence in the effect estimate, and the true effect is likely to be close to the estimate of the effect, but there is a possibility that it is substantially different;

4) High quality (□□□□), which there is high confidence that the true effect lies close to that of the estimate of the effect.

Outcome	Studies	No. of Studies	No. of Women	GRADE	Downgrade Considerations
Change in fasting glucose	25, 28, 29, 21, 35, 12, 24, 27, 34, 14, 26, 23, 33	13	662	⊕○○○	Study limitations: High risk of selection, performance, detection, attrition and reporting bias. Inconsistency: Considerable Indirectness: population applicability
Change in postprandial glucose	25, 29, 21, 24, 27, 34, 14, 23, 33	9	475	⊕○○○	Study limitations: High risk of performance, detection, attrition and reporting bias. Indirectness: population applicability
Change in post-breakfast glucose	29, 24, 14	3	175	⊕⊕○○	Study limitations: High risk of performance and detection and reporting bias. Imprecision: wide confidence interval and small sample size
Change in post-lunch glucose	24, 14	2	92	⊕⊕○○	Study limitations: High risk of performance and detection and reporting bias. Imprecision: wide confidence interval and small sample size
Change in post-dinner glucose	24, 14	2	92	⊕⊕○○	Study limitations: High risk of performance and detection and reporting bias. Imprecision: wide confidence interval and small sample size
Change in HOMA-IR	35, 12, 26, 23	4	212	⊕○○○	Study limitations: High risk of reporting bias. Imprecision: wide confidence interval Inconsistency: Considerable
Change in HbA1c	28, 29, 21, 27, 14, 23, 33	7	407	⊕○○○	Study limitations: High risk of performance, selection, detection and reporting bias. Imprecision: wide confidence interval Inconsistency: Considerable
Medication use	13, 25, 28, 29, 21, 22, 35, 30, 31, 34, 26, 23, 33, 32	15	1023	⊕⊕○○	Study limitations: High risk of selection, performance, attrition and detection bias. Indirectness: population applicability
Birthweight	13, 25, 28, 29, 21, 22, 35, 12, 24, 31, 27, 34, 14, 26, 33, 32	16	841	⊕○○○	Study limitations: High risk of selection, performance, attrition, detection and reporting bias. Imprecision: wide confidence interval Inconsistency: Considerable Indirectness: population applicability

Large for gestational age	13, 25, 28, 30, 31, 14, 23, 33	8	647	⊕⊕○○	Study limitations: High risk of performance, attrition, detection and reporting bias. Indirectes: population applicability
Macrosomia	13, 25, 28, 29, 22, 35, 24, 30, 31, 34, 26, 33	12	834	⊕⊕○○	Study limitations: High risk of selection, performance, detection and attrition bias. Indirectes: population applicability
